### Janet Weis Children's Hospital sets the standard for pediatric care.

Janet Weis Children's Hospital is the only place in the region that brings together a skilled group of pediatric subspecialists—more than 50 in all—to provide expert care to critically ill children in central and northeast Pennsylvania.

We have nationally renowned specialists trained specifically to treat children, performing the most effective surgical and non-surgical procedures available. They use the latest technological advancements, all designed and sized to meet the specific needs of children. Our doctors are there for the child and the parents throughout the entire treatment process—from consultation through follow-up care—and our dedicated pediatric nurses add a level of skill and compassion that parents find exceptional.

If your child has a serious health problem, ask your child's doctor to refer you to a specialist at Janet Weis Children's Hospital or call 1-800-275-6401. We were there for thousands of children across Pennsylvania, and we're here for you too.
