

# I chose Guthrie for the collaboration.

**Joseph Scopelliti, MD**  
CEO, Guthrie Health

“My very first day here, I sensed that Guthrie was a different place. Thirty-six years later, its core values of patient-centeredness, teamwork and collaboration continue to help us achieve optimal outcomes for patients. Physicians who join Guthrie find an inclusive and rewarding environment in which they thrive.”

Where compassion and excellence come together to make a meaningful difference in the lives of those we serve. Every person. Every time.

#### Our Vision

Founded in 1910 by Dr. Donald Guthrie in Sayre, PA, Guthrie Health System is among the most respected systems in the country. To this day we adhere to his vision of service, stability and continuous improvement. Our team-based philosophy is a springboard for cross-fertilization of ideas, techniques and treatments to better serve our patients. We are fiscally stable, with a robust AAA bond rating. Our capabilities continue to grow as we enlarge the ER and new campus of our hospital in Troy, PA. In Corning, NY, we're replacing our hospital with a new 270,000-square-foot facility featuring state-of-the-art technologies. Dr. Guthrie would be proud of how we are continually striving to improve the overall health, quality of life and productivity of thousands across the region—leading to longer, healthier and happier lives.

#### Why Physicians Choose Guthrie

Everything we do is driven by what's best for the patient. There are no physician competitors here, only colleagues. We've invested \$40 million in advanced electronic health records that put information at the fingertips not only of our physicians, but our patients as well. Our advanced technologies, rarely found in rural facilities, also draw the brightest and best minds, while minimizing patient travel times. We consistently rank among the best for quality of patient care as monitored by Delta Group's CareChex® rating system, and are frequently listed in Thomson Reuters' Top 100 Hospitals. We're also focused on the three predominant health concerns affecting humanity—heart and vascular, cancer, and musculoskeletal disease. Our network of regional hospitals and offices provides an unparalleled combination of internal, family and specialty medicines across the southern tier of New York and the northern tier of Pennsylvania. Quite simply, there is no care like Guthrie care. And we'd be honored to have you begin or extend your medical career with us.

Do your physician skills, interests and dedication to excellence align with ours? If so, you may be one of the uniquely qualified and compassionate providers we seek to help us expand our scope of services to ensure the best possible care and access for all those we serve.
